

METALMESSAGE

„IV“

Style:

Pagan-, Viking- & Folk Metal

Release date: October 2007

Media facts:

- 13 international based hordes
- Once more with overwhelming cover art, crafted by French brush-grandmaster Jean-Pascal Fournier – theme: "Druid's summoning of Celtic god Cernunnos within the cauldron"
- Finest graphical layout
- Outstanding high quality compilation release
- Release of "V" is already in focus for middle/late 2008

There has been released really not less of underground-CD-compilations these past years, and so many of them all were done without real heartblood & with a very low degree of passion for this unique genre

The Metalmessage-compilations on the other hand are created with a massive dose of enthusiasm, for the bands and also for the contributing cover-artists

So this time well known artist Jean-Pascal Fournier from France did an awesome exclusive frontcover-artwork – and also Belgium's famous specialist for mystic graphical arts, Kris Verwimp, has painted a special marvellous CD-label design.

Well chosen compositions are included now for the 4th time to attack the ears of the listeners with fine epic sounds & pure pagan power!
