

METALMESSAGE

„Vol. III“

Style:

Pagan- / Viking- / Folk- & Black Metal

Release date: 01.09.2006

Media facts:

- 14 international based hordes
- Overwhelming cover & booklet-art, crafted by Belgian brush-grandmaster Kris Verwimp
- Finest graphical layout
- Outstanding high quality compilation release
- „Vol. IV“ is in focus for spring 2007

There has been released really not less of underground-CD-compilations these past years, and so many of them all were done without real heartblood & with a very low degree of passion for this unique genre.

The Metalmessage-compilations on the other hand are created with a massive dose of enthusiasm, for the bands and also for the contributing cover-artists

International based hordes from all over the world are included now for the 3th time to attack the ears of the listeners with power

This time well known artist Kris Verwimp from Belgium did an awesome frontcover-artwork as well as fantastic booklet-arts

Layout by Digisteve.com
