Well, there has been released really not less of underground-CD-compilations these past years, and so many of them all were done without real heartblood & with a very low degree of passion for this unique genre!

The Metalmessage-compilations on the other hand are created with a massive dose of enthusiasm, for the bands and also for the contributing cover-artists!

**So this time the very well known & legendary US artist Ed Repka painted a stunning coloured exclusive frontcover artwork!**

Layout & design by digisteve.com

Well chosen compositions are included now for the 5th time to attack the ears of the listeners with fine epic sounds & pure pagan power!
